

Simtec AG is a manufacturer of mechanic and electronic products. In accordance to the European Commission REACH Regulation (EC 1907/2006), we are a so-called "downstream user". The products which we supply to our customers are solely non-chemical goods. Simtec AG is not obligated to register them or to create material safety data sheets (MSDS).

We hereby declare that all our manufactured parts and the packaging do not contain more than 0.1% (weight/weight) for any of the Substances of Very High Concern (SVHC) (REACH Regulation (EC) 1907/2006; current Candidate List on [www.echa.eu](http://www.echa.eu)), exemption see below.

Simtec insists on pre-registration of all chemical substances by its suppliers who produce chemical substances or import these to the European Union (EU). Simtec's suppliers take responsibility for the flow down of REACH Conformance to sub-tier suppliers.

Simtec checks the SVHC publications twice a year, in January and in July.

Simtec monitors its suppliers regularly for compliance with the REACH Regulation. If discovered otherwise, affected customers will be informed immediately.

Exemption:

Lead (CAS-No. 7439-92-1) is listed as a substance of very high concern (SVHC).  
Simtec PCBs (printed circuit boards) are soldered with leaded solder to prevent the formation of whiskers (see RoHS Declaration DOC-843-CF5).

When used as intended, these products are not hazardous to health.  
If discovered otherwise, affected customers will be informed.

Signed:

A handwritten signature in blue ink that reads "K. Bürgel".
